

EPA is providing information on NSF-60 certified CO2 suppliers in the event that water utilities need to identify alternative companies, pursuant to Section 1442(a)(2) of the Safe Drinking Water Act. EPA does not endorse companies or specific products, absent any statutory authority to do so, and recommends that utilities contact individual companies for additional information.

## NSF-60 Certified Suppliers

The map on the next page provides information on utilities that utilize CO2 and facilities that supply NSF-60 certified CO2. Many of them operate in multiple states. CO2 producers often sell their CO2 to a supplier that can process (e.g., purify, compress) and deliver the CO2 to water utilities and other customers. The map shows the location of CO2 suppliers relative to water utilities as proximity to a CO2 supply can be a critical constraint given that long distance transport of high purity CO2 can be prohibitive in terms of expense and logistics. Clicking on a state abbreviation will bring you to the full list of suppliers by state, found in [Table 1](#).

The suppliers listed in the map and corresponding table below were identified through the [NSF website](#). To search for NSF-60 certified suppliers and other certified drinking water chemicals, visit the [Search for NSF-60 Certified Drinking Water Treatment Chemicals page](#).

# NSF-60 Certified CO2 Suppliers and Water Utilities Using CO2

*Updated 8/10/21*

**Legend**

- Water Utilities using CO2\*
- NSF-60 Certified CO2 Suppliers
- No Water Utility Data Available

\*The following states have no Water Utilities that utilize CO2:  
AL, CT, DE, HI, KY, NC, OR, RI, SC, VA

Table 1. NSF-60 Certified CO2 Suppliers by State

<b>Alabama</b>	
<b>Company Name</b>	<b>City</b>
Linde US - Praxair	Decatur
<b>Arkansas</b>	
<b>Company Name</b>	<b>City</b>
